Evolve Your Security

secured services

Your Reliable Security Partner

Secure Measure ensures your investments are deployed optimally and protecting you. Our Managed Security Service oversees your day-to-day operations and takes a proactive approach to your cybersecurity.

If you don't have the resources for a dedicated in-house cybersecurity solution that's robust enough to maintain your company ahead of threats, Secure Measure brings you a holistic managed security solution you can scale according to requirements and the pressures your organisation is facing.

- ◆ Risk Assessment
- ◆ Continuous Evaluation
- ◆ Reporting & Analysis
- ◆ On-site Time

managed SIEM

Organised Security Event Intelligence

We provide an end-to-end SIEM service. We help your organisation understand its risk using our internal risk assessment framework to ensure we start working on the biggest risks faster. We work with you to develop a plan using existing assets, capabilities and security systems to monitor the risk. As we monitor, our methodology feeds back continual improvements into the process to ensure we are monitoring the right data to ensure the specific risk is covered.

“You’ve invested in your cybersecurity capabilities and want to get the most out of them to really protect your business. With Secure Measure; you will.”

~Martin McGregor, CEO

privacy assurance

Addressing Data Security through Risk Management

There's a maturing appreciation of the interplay between Privacy, Cybersecurity, that dictates the Data Security of any entity. With new frameworks starting to emerge, taking on a leading position now is of critical importance.

Privacy is the very foundation for digital trust. Any notion of potential compromise of the very sensitive Personal Identifiable Information (PII) you hold and customers will rapidly move away from your business. Trust is also the primary exchange mechanism between organisations.

If your customers or business partner don't trust you with their data, your business inevitably suffers. Secure Measure's Privacy Assurance program ensures the you warrant their trust.

endpoint management

Optimising Endpoint Management for Enterprise

To remain competitive in today's global environment, your people need access to corporate data and documents, on any device, anywhere around the world. However, facilitating productivity on endpoint devices, while also maintaining compliance and corporate security, has become an endless and expensive fire-fighting exercise.

By taking a completely new approach to the issue of endpoint management, FreshPoint not only provides compliance, improved security and maximum uptime, it does so at an average of one quarter of the total operating costs of your current processes and other endpoint management systems.

Isn't it time you took a Fresh approach to endpoint management?
